

OPTICRANE

ADVANCED CRANE TECHNOLOGY

JOB CLASSIFICATION: *Apprentice Electrical/Mechanical Technician Position*
REPORTS TO: *General Manager*

JOB DESCRIPTION: We are seeking an individual with a unique skill set to work as an Apprentice Electrical/Mechanical Technician to join our OptiCrane Inc. team at our Maple Ridge office. The right candidate will be working on different types of cranes to provide an on-going support to our clients. The right candidate will be a self-starter who is quick to learn and must possess excellent problem-solving skills and not be afraid of heights.

OptiCrane Inc. with its Advanced Crane Technology products, provides safe, efficient and comprehensive turnkey **management solutions and products for today's mobile, Self-Erect, Tower and Luffing Cranes' Operators, Managers, Leasers, End users and Owners.** For crane safety products and crane anti-collision management, look no further than OptiCrane.

Operating as a bilingual company, we understand the construction requirements and rigorous conditions that are required to operate cranes and large heavy equipment safely and efficiently. We provide each client with specifically tailored solutions to meet their production, safety, due diligence and compliance goals.

RESPONSIBILITIES:

- Perform equipment installation on different types of cranes;
- Inspect, maintain & repair inventory equipment;
- Ensure operating equipment functions properly and offer technical support to clients;
- Responsible to produce service call and installation reports;
- Compliant to company policies & procedures and applicable safety regulations and codes;
- Maintain and manage inventory system;
- May preform other related duties as assigned.

REQUIREMENTS:

- Experience in Electrical or Mechanical field is an asset;
- Not afraid of heights;
- Excellent attention to detail, manual dexterity and hands-on skills;
- Exceptional organizational skills;
- Proven ability to prioritize and take ownership;
- Ability to work both independently and in a team environment;
- Effective communication skills;
- Possess excellent time management and decision-making skills;
- Proficiency with MS Office applications including Word, Excel, PowerPoint; Ability to adapt and use various programming software, perform firmware updates, interpret drawings and use applicable software for the design of components to be later engineered and produced. Knowledge in PLC programming an asset;
- Fast learner as this position requires on the job training;
- Drivers licence and excellent driving record.

BENEFITS & WAGE:

- Attractive Health benefit package.
- Vacation based on experience.
- Company vehicle provided.

WORK LOCATION:

- Lower Mainland with office in Maple Ridge
